

TABLE OF CONTENTS

A BRIEF INTRODUCTION	9
GEOGRAPHY AND DEMOGRAPHY	17
Sizes	17
Physical geography	21
Weather and climate	25
The tyranny of distance	29
The variability and unpredictability of life in the pre-industrial world	30
Population and population density	31
Life expectancy, health and disease	34
Violence	43
ENERGY	47
Human labour power	47
The labour power of animals	52
Firewood	58
Peat	60
Coal	62
Gunpowder	65
Watermills	66
Windmills	68
Water and wind and their role in transport	70
RESOURCES	75
Land	75
Animals	79
Animal manure and night soil	85
Wood	90
Metals: iron and bullion	93
Frontiers and ghost acreages	96

AGRICULTURE	105
The agricultural labour force, the share of agriculture in GDP and urbanisation	105
The importance of food in budgets	110
Agricultural productivity	115
Agricultural systems: China's rice economy	121
Agricultural systems: Great Britain's wheat economy	125
What about Japan?	129
EXCHANGES	131
Migration	131
<i>Intercontinental migration</i>	132
<i>Slave trades and the importance of other forms of 'coerced migration'</i>	133
<i>The demographic impact of European overseas migration</i>	137
<i>Chinese and Japanese overseas emigrations</i>	138
The Columbian Exchange: flora, fauna and diseases	139
Flows and stocks of bullion	144
<i>Monetary systems</i>	151
<i>Technologies and relative scarcities</i>	154
Intercontinental commodity trade	155
<i>A modern world-system?</i>	158
<i>A sinocentric alternative to Eurocentrism?</i>	161
<i>Intercontinental trade as an almost entirely European affair</i>	166
STAGNATION AND GROWTH	169
The tension between population and resources	169
<i>Positive checks</i>	170
<i>Preventive checks: The (Western) European marriage pattern and East Asian alternatives</i>	172
<i>Sustainability in Tokugawa Japan</i>	176
A world without growth?	178
<i>Malthusian constraints?</i>	178
<i>Efflorescences</i>	183
<i>Modern economic growth before the Industrial Revolution? The case of Song China, 976-1279, as compared to developments under the Ming and Qing</i>	185
<i>Modern economic growth before the Industrial Revolution? The case of the Dutch Republic during its Golden Age</i>	187
Sprouts of pre-modern growth?	188
<i>GDP, wages and incomes</i>	188
<i>Inequality, poverty and famine</i>	194
<i>Consumption</i>	203

SOURCES OF GROWTH? CHANGES IN PRODUCTION AND TRANSPORT	207
Increased production and productivity in agriculture	207
Industrious revolutions	210
Increased investment and (micro-)innovations	218
Improved human capital	219
A better measure of reality	226
Improved transport	227
<i>Transport over land</i>	227
<i>Transport over water</i>	233
<i>Shipping on the open seas</i>	238
SOURCES OF GROWTH? MARKETS AND STATES	243
Specialisation and market extension	243
Global market integration	248
A rise of capitalism?	249
<i>A decline of the commons?</i>	252
<i>A decline of the guilds?</i>	253
<i>A rise of free labour?</i>	255
<i>Capitalists, capitalism and the state</i>	256
State formation, state capacity and empire	259
<i>State formation and state capacity</i>	259
<i>Military strength</i>	271
<i>Empire building versus imperial disintegration</i>	273
THE GREAT DIVERGENCE	281
The emergence of a new economic regime	281
<i>New energy and new technology</i>	285
<i>Railways and steam shipping</i>	290
<i>The wider impact of the new economic regime</i>	293
<i>Great Divergence and fossil-fuel ghost acreage</i>	296
Exchanges	298
<i>Migration during the Great Divergence</i>	298
<i>Great Divergence, import ghost acreage and Great Specialisation</i>	300
Different trajectories, change and continuity	304
Investment and Great Divergence	310
<i>The case of Great Britain</i>	310
<i>Did the Dutch Republic, Qing China or Tokugawa Japan have sufficient financial resources to industrialise?</i>	314
REVIEW AND REFLECTION	319
BIBLIOGRAPHY	323
