Foreword	7
Introduction	9
Chapter 1	
Scientific integrity: an exploration of an elusive concept	13
1.1 Discredited by fraud	13
1.2 Integrity as a standard linked to one's position	15
1.3 Integrity as a standard for one's own behavior	18
1.4 Scientific values and the basic standards of integrity	21
1.5 Scientific integrity in practice: an initial exploration	25
Chapter 2	
The codification of behavioral standards for scientific research	31
2.1 Muddying the waters of science: the Stapel affair	31
2.2 Some examples of fraud	32
2.3 Four conceptual distinctions	35
2.4 The emergence of norms in scientific practice	36
2.5 A case study: the codification of norms in the Netherlands	41
2.6 The Netherlands Code of Conduct for Scientific Practice of 2004/2012/2014	45
2.7 The Netherlands Code of Conduct for Research Integrity of 2018	49
Chapter 3	
Scientific fraud: lessons from history	57
3.1 A new phenomenon?	57
3.2 What phenomenon? A more precise definition of scientific fraud	59
3.3 A frequent phenomenon?	62
3.4 Do performance pressure and dishonesty go hand in hand?	63
3.5 Commissioned research: under pressure to adjust?	69
3.6 Towards an explanation of scientific fraud?	72

Chapter 4	
Addressing scientific integrity complaints	79
4.1 The establishment of committees for scientific integrity	79
4.2 The complaint procedure in the Netherlands: the legal framework	80
4.3 The current complaint procedure	83
4.4 Principles of fair trial in addressing fraud complaints	84
4.5 Setting the boundaries: practical problems and examples	88
Chapter 5	
Plagiarism and self-plagiarism	97
5.1 Violation of the basic rules of science	97
5.2 Taking credit for other people's work	100
5.3 Scope and frequency of plagiarism	106
5.4 Self-plagiarism	109
5.5 Plagiarism complaints: power relations and reporting	117
Chapter 6	
Frequently asked questions about scientific integrity	121
6.1 Who can complain about whom? To which authority?	121
6.2 Matters worthy of complaint (I): fabrication and falsification	125
6.3 Matters worthy of complaint (II): co-authorship	130
6.4 Is there a statute of limitations for scientific misconduct?	136
6.5 Minor errors, major negligence and questionable research practices	138
Chapter 7	
Integrity: regulation, prevention, instruction	147
7.1 Trust in science: self-correction and self-regulation	147
7.2 A closer look at the system of self-regulation	152
7.3 Three conditions for self-regulation	156
7.4 Prevention of fraud and misconduct: integrity policy	159
7.5 Can integrity be learned? Education in science ethics and other skills	162
7.6 Ten rules of scientific integrity	164
7.7 What can we learn from integrity?	167
Works cited	169
Index	181
