Part 1 | Insight

	page
Useful Reference Data	
1. Energy: A Truly Special Case	12
2. Energy: What Exactly Is It?	15
3. Human Energy	19
A. Heat	19
B. Work	20
C. How Do I Keep My Temperature Constant?	21
4. Domestic Energy	25
A. Domestic Energy Supply	25
B. Home Heating and Cooling	26
B1. Heat Sources	26
B2. Cooling and Air-Conditioning	29
B3. Heat Exchangers: Free Energy	31
B4. Heat Losses and Home Insulation	31
C. Hot Water	37
D. Baking and Cooking	38
E. Electric Appliances at Home	40
F. Comparison of Various Energy Users	46
G. Energy Needed to Produce Something	47
5. Moving Around: Energy and Transportation	49
A. Cars	49
B. Buses and Trains	55
C. Aircraft	57
D. The Bicycle	61
6. Energy: National and World-wide	65
A. Differences Across the Globe	65
B. Energy Use in an Industrialised Country: the Netherlands	66
C. Europe	69
D. The World: Supply and Demand	70
7. CO ₂ and Global Warming	75
A. Natural Greenhouse Effect	75
B. Man-made Greenhouse Effect	78
B1. The Facts	78
B2. Possible Consequences and Uncertainties	81
B3. Possible Remedies	85
B4. Economic Aspects	87
B5. Emission for Various Fuels	88

Part 2 | Outlook

	page
8. Solar Energy	91
A. The Potential of Solar Energy	91
B. Capturing Solar Energy by Various Mechanisms	95
B1. Trees, Plants, Solar fuels, Algae, Bacteria	96
B2. Solar Heat: Passive Use and Solar Collectors	101
B3. Electricity by Photovoltaic Cells (PV)	103
B4. Electricity by Concentrated Solar Power (CSP)	109
9. Wind Power	116
A. The Potential of Wind Power	116
B. Types of Wind Turbines and Their Efficiencies	120
C. Space Demand and Wind Farms	121
D. Contribution, Variability and the Cost of Wind Power	123
10. Energy from Water and from Soil	127
A. Hydropower	127
B. Wave Energy	128
C. Tidal Energy	132
D. Temperature Differences in the Oceans (OTEC)	133
E. Osmosis: Salt and Fresh Water ('Blue Energy')	133
F. Geothermal Energy	135
11. Nuclear energy	139
A. Fission	141
A1. Current Fission Reactor Technology	141
A2. Fuel Cycle and Possible Hazards	144
A3. Present Role of Nuclear Fission World-wide	148
A4. Breeder Reactors	150
A5. Pros and Cons of Nuclear Fission	152
B. Fusion	153
B1. Potential of Nuclear Fusion	153
B2. Nuclear Fusion in Practice	153
B3. Pros and Cons of Nuclear Fusion	158
C. Radioactivity and Health Hazards	159
C1. Various Kinds of Radioactivity and Their Effects	159
C2. Half-life, Radioactivity, Doses and Hazards	162
D. Comparison of Various Ways to Generate Electricity	164
12. Energy Storage	167
A. Why Store Energy?	167
B. Various Kinds of Storage	168
B1. Electricity	168
B2. Heat	170
B3. Hydrogen as an Energy Carrier	171
Epilogue: How to proceed?	179
